

Shell Lubricants announced the launch of a new grade of premium, semi synthetic engine oil

Ahmedabad: Shell Lubricants, the global market leader in finished lubricants, today, announced the launch of a new grade of premium, semi synthetic engine oil under the Shell Advance AX7 range. An increasing number of automobile OEM's are looking to improve fuel economy of their vehicles by using appropriate low-viscosity, friction reducing engine oils. With the launch of the Shell Advance AX7 10W-30, we want to complete our portfolio by introducing a superior product in line with changing market trends. Specially formulated for new powerful engines and modern bikes, the latest addition to the Shell Advance portfolio will enable passionate consumers to experience power like never

before. Priced at INR 453, the Shell Advance AX7 10W-30 will be available in packs of 1 liter and 0.9 liter across India and will come in an innovative, convenient and attractive limited-edition pack.

The product was unveiled in New Delhi by Ms. Mansi Tripathy, Country Head, Shell Lubricants India and Mr. Danilo Petrucci, celebrated MotoGP Rider of the Pramac Racing team. The event is a reinforcement of Shell's technical partnership with Ducati, helping Shell meet and exceed customer expectations around the world. The partnership has been invaluable for the continued development of Shell Advance products in the most testing environments. (1-7)

VICTORIA AND INDIA: STRENGTHENING TIES THROUGH SPORTS

Ahmedabad: The State of Victoria, Australia celebrated six key sporting activities occurring in India and Melbourne over the next six months which are aligned with Victoria's India Strategy to strengthen trade, investment and people to people linkages.

The Victorian Government hosted a reception for the Indian sports fraternity and celebrated India and Victoria's shared passion for sport while profiling Victoria's world-renowned sports ecosystem and India's growing sports proficiency.

Guest of honour, HE Linda Dessau AC, Governor of Vic-

toria on her second visit to India within one year, recognised a number of sporting initiatives including: Tennis Australia's Australian Open Global Ball Kids program which will enable 1000 young people in Indian schools and sporting clubs to participate in a training camp, with up to ten selected to represent India at the Australian Open in January 2019. Glenmark Pharmaceuticals creates Guinness World Record

Ahmedabad: Glenmark Pharmaceuticals Ltd, a research-led global integrated pharmaceutical company, is pleased to announce that it has created a new Guinness World Records™ feat by screening the highest number of persons for blood pressure in an hour.

To create this Guinness World Record titled "The most blood pressure readings taken in an hour (multiple venues)", Glenmark partnered with 37 hospitals in 21 cities across India and screened 11,416 persons in an hour, breaking the previous record of 5,315 screenings. In Ahmedabad, 287 persons were screened at Civil Hospital.

Sujesh Vasudevan, President, India Formulations, Middle East and Africa at

Glenmark said, "Hypertension or high blood pressure leads to a number of heart-related diseases but most patients are not even aware that they suffer from it. Through this initiative, we wanted to create awareness about the importance of timely diagnosis of hypertension and ways to effectively manage it."

Swarnil Dangarikar, Official Adjudicator, Guinness World Records™ said, "I am glad to share, Glenmark has broken the record for most blood pressure readings taken in one hour with 11,416 participants. The attempt was successfully conducted at 37 venues across India and has beaten the previous record by a huge margin. I congratulate the entire team on accomplishing this huge task." (19-10)

South Africa based Recoveri entering India with its Microdot technology

Ahmedabad: South Africa based Recoveri, manufacturer and exporter of technologically superior micro tag identification and trace solutions for vehicles and other movable domestic and corporate assets world wide is entering India with its Microdot technology, a highly effective form of vehicle marking and powerful theft deterrent. MicroDot technology is a very effective form of Whole of Vehicle Marking. It involves spraying thousands of the small dots laser etched with a PIN (Personal Identification Number) number, linked to the Vehicle VIN Number, are sprayed throughout the vehicle. As the polymer dots are

1mm by 1mm it is impossible to locate and remove them all, so no matter how well it's disguised, the car's true identity can always be established.

"The technology is already used across the world as a way of identifying car engines and components. The microdot etched with a PIN number and other identification details, are printed onto a microdot, which is then attached to the engine or component. Microdots contain an ultraviolet tracing agent that fluoresces under an ultraviolet or black light, allowing dots to be easily read with a magnifier, but are difficult to detect with the naked eye. If the vehicle is stolen, the authorities can trace it quickly and effectively just by reading the information on the almost invisible dot without the need to resort to shining black lights or using complicated technological trickery. All they do need is a simple handheld UV Light and microscope." Said Phillip Opperman, CEO, Recoveri. The leading South African MicroDot solution company while launching the product in India. (18-7)

India continues its winning streak; defeat Sri Lanka by 1 run

Ahmedabad: India have beaten Sri Lanka by 1 run in the 5th Tri Series match here in Goa to advance to the finals. Sri Lanka won the toss and opted to field in hot and humid conditions. The Indian opens started off with a fifty run partnership and the batsmen who followed kept the momentum going as the hosts finished their innings

at 192 for the loss of 5 wickets.

Chasing the huge target the Lankans got off to a flier but the Indian side, specially the fielders bought them back into the game with four run outs. The lower order showed great resistance and brought Sri Lanka close to a win. With 2 runs required of 3 balls, captain Ajay Reddy bowled dot balls to hand India a win. India now move into the finals which will be played on 13th October 2018 at the GCA stadium in Porvorim. (16)

'Every child deserves the #TouchOfCare' states Vicks

Ahmedabad: Vicks, a brand synonymous with family and care, has launched the second edition of Vicks #TouchOfCare, its heart-warming campaign that went viral last year. 'Vicks - One in a Million' is yet another inspiring story, this time of Nisha, a young girl who has Ichthyosis, a genetic skin condition. The transformation of Nisha due to the love and care provided by her adoptive parents Aloma and David Lobo, forms the crux of this digital video.

The second campaign continues to spread the idea that 'Every Child Deserves the touch of Care'. Created by Publicis Singapore, the story is a first-person narrative by Nisha, an orphaned girl with Ichthyosis who was abandoned by her biological parents when she was just two weeks old. Her life was transformed when she was adopted by Aloma and David Lobo, who despite having children of their own, gave Nisha a family which showed her with unconditional

love and the #TouchOfCare. The film gracefully captures Nisha's story as she sails through the challenges and complexities of life, with her mother and a family at her side. It beautifully depicts how Nisha, who is an extraordinary girl, leads an ordinary, regular life - one of hopes, dreams and challenges - and how Aloma has brought her up in a way that is no different from anyone else.

Overwhelmed with the response to Nisha's story, David and Aloma Lobo, the parents of Nisha, the protagonist of the newly launched Vicks #TouchOfCare film said, "We are delighted that Nisha's story is part of the globally acclaimed Vicks #TouchOfCare campaign. Our daughter's story could not have been told in a nicer way, and we do hope that the millions of people who see the Vicks #TouchOfCare film, are motivated to give unconditional love and care to vulnerable people, who need it the most." Girls are biologically stronger than boys and must receive adequate nutrition, health care facilities and education

Vinod Chandrashekhar Dixit
Free-lance Journalist
Ahmedabad

In order to highlight and address the needs and challenges girls face today, 11th October was marked as the International Day of the Girl. Addressing the country's disgraceful record on infanticide, our PM Narendra Modi had rightly said that "Women in India should be valued more. The gender ratio in India is at its most unbalanced since 1947, with 1000 boys for every 927 girls, and families should stop aborting girl fetuses. Indian society is still largely male dominated, and women are often looked down upon. The birth of a female child is often regarded as a disaster, and female foeticide is common in parts of India (despite the Pre-Natal Diagnostic Techniques Act, 1994). When a male child is born everyone rejoices, but when a female child is born many seem dejected and crest-fallen, as if a tragedy has occurred. A home is no home, which does not have a daughter. It is only because of our mothers that we live today. Inequality about girl child is a vast problem which includes many areas like inequality in education, nutrition, legal rights, medical care, protection, honour, child marriage and so many. India loses an average of 7,000 girls every day through abortions

because of a traditional preference for sons. Abortions have also resulted in a severely skewed gender ratio in India, where there are only 927 females for every 1,000 males - far lower than the worldwide average of 1,050 females. In our country, female literacy rate is still 53.87% and one third of the younger girls are malnourished. No doubt, to address the girl child issues associated to their health, respect, education, and nutrition and etc. government has taken various initiatives that has resulted the girl child education status improved through the free and compulsory primary school education for both boys and girls till 14 years of age. Our Constitution entitles women to equal opportunities and rights, but in some parts of the land the rate of female foeticide was high and the gender ratio terribly skewed. Girls are not being sent to school in many places and women face prejudice and discrimination at the workplace. We Indians call our nation mother India and are great devotees of Mother Goddess in various manifestations. But is this devotion and respect for the country limited to only a few words or do we actually implement these values. No, we all are openly playing a double standard game with our country. One way we say mother India and the other way we are continuously destroying the valuable gift of nature, a girl child.

Latest inventions in medical field of gender detection have allowed the rate of female foeticide increase in India. Still there are mother who desires to have abortion if the ultrasound test detects a girl child. But wait a moment...what can you see in the ultrasound test? Ten tiny fingers, ten tiny toes, innocent face, ready to come out and feel the beauty of nature and love of mother. When you close your eyes and you will hear a sweet voice from within, "Mamma. Will you still abort your unborn girl child? No, you can't be so cruel, at least not to someone who is a part of you. Becoming a mother is the greatest gift of God. Treasure this gift whether you have a baby boy or baby girl. Boys and girls are like two hand human body. In the absence of the one the other is incomplete. This is the time to take an initiative to apply brake on the undesirable practice of girl discrimination. Girls must enjoy the right to birth, right to freedom, and right to education. Girls are biologically stronger than boys and must receive adequate nutrition, health care facilities and education. They must be given opportunities to explore themselves and prove their capabilities. As mothers, they are responsible for imparting values, cultural beliefs and manners in their children. Hence, they must be educated spiritually, emotionally and intellectually. Women are the backbone of society to bring in strength, harmony, cooperation, humanity and eventually transforming the

society into a compassionate and peaceful place to live in. In India, the female child sex ratio has decreased substantially. The PM also criticised doctors for using their expertise "meant to save lives for killing" and "betraying" society. Beti Bachao Beti Padhao' is a key scheme that aims to address the dipping child sex ratio and empower the girl child in the country. It aims to generate awareness and improving the efficiency of delivery of welfare services meant for women. When today our modern India offers a lot of opportunities to women. This is one side of progressing India where on the other side if one looks at gender decline in the sex ratio, the dark side of Indian society comes in front. To be equal to the number of women in the society, people should be aware of saving the girl. On a large scale, the Government of India has taken some positive steps in relation to the safety of girls: Protection of Women from Domestic Violence Act of 2005, Prevention of Child Sexual Abuse, immoral trafficking (Prevention) Act, proper education, gender equality etc. The sex ratio imbalance is a serious issue and finding a solution has to start with making the girl child valuable.

CM Vijay Rupani flags off Karuna Animal Ambulance-1962 Service in 26 districts

Gandhinagar: Gujarat Chief Minister Vijay Rupani today launched the Karuna Animal Ambulance-1962 Service in 26 districts of the state at a function from Gandhinagar in presence of Deputy Chief Minister Nitinbhai Patel, besides Ministers Bhupendrasinh Chudasma, Kunwarjibhai Bavalia and Bachubhai Khabad. They handed over the keys of the ambulances to doctors concerned and pilots of the respective districts. Speaking on the occasion, Mr. Rupani said that it is not a thick-skinned government but a soft-hearted government with compassion towards individuals to the entire animal world. He said the Karuna campaign had saved 25,000 birds injured by kite strings during the state-wide kite festivals from January 10 to 20 in the last count. He said it is a transparent, sensitive, decisive and progressive government, having

launched earlier the GVK EMRI 108 Ambulance Service for human beings in emergency like road accident, delivery, etc - taking a lead in the country. He said that we consider cows as mother in our culture. Our aim is protection and preservation of cattle wealth that contributed to white revolution in the country. Deputy Chief Minister Nitinbhai Patel said the Karuna Ambulance Service has been a great relief for injured or sick animals who were earlier left to succumb to slow and painful death on roadside. He said that Gandhiji's Gujarat has been compassionate towards the animal land, for centuries. Animal Husbandry Minister Kunwarji Bavalia also spoke on Gujarat's prominence in dairy industry and the state government taking care of the health of the cattle wealth. Animal Husbandry Secretary Mohammed Shahid welcomed the guests and Director Kachhiya Patel proposed a vote of thanks. Those present on the occasion included Additional Chief Secretary for Agriculture and Animal Husbandry Sanjay Prasad, animal activists, panjrapol (cattle pounds) and cowshed.
