In spite of growing population and resource extraction pressures on their habitat. Tigers are the heritage of our country, evoked in the vedas, puranas and many other literature for their unparalleled strength and aesthetic beauty. The destruction of forest coverage by Maoists may be one of the reasons for this decrease. Wild animals deaths were also reported from Andhra Pradesh, Assam, Kerala, Karnataka and Uttarakhand.

We should know that we are not just animals, but that we belong to the same family tree as other mammals, that our physiology and bodily processes are just like theirs, and that our mental processes too are from the same general pattern. The protection of the national animal has been a significant achievement till now. Hope this continues and leads to a significant rise in the coming years. Among animals, some are fewer in number than the others. If proper care and security are extended to them, the rare animals would survive. Only the future can tell whether national animal will survive to maintain the much-needed ecological

balance. If we delay now, it might be too late.

Tigers play a large role in sustaining the biodiversity of forests, in maintaining healthy ecology, habitat conservation and the livelihoods of rural communities. The tiger population has decreased in the states of Telengana & Andhra Pradesh. The destruction of forest coverage by Maoists may be one of the reasons for this decrease. Wild tiger deaths were also reported from Andhra Pradesh, Assam, Kerala, Karnataka and Uttarakhand. During the first six months of the year, 30 deaths were reported. The protection of the national animal has been a significant achievement till

now. Hope this continues and leads to a significant rise in the coming years. Credit must also be given to Aircel for initiating "Save Tiger" campaign, along with New Delhi Television (NDTV), who played an active role in creating awareness among the people on dwindling tiger population in India. The number of wild tigers has gone up to 3,890, from the earlier 2010 estimate of 3200, according to the World Wildlife Fund and the Global Tiger Forum. A new Tiger commando force should be created to protect tigers from the poachers. Government must try to put in more efforts to improve the arrangements to conserve the national pride - the Tiger.
