

Veteran Actress Reema Lagoo has become a role model and an inspiring personality for every woman

Vinod Chandrashekhar Dixit
Free-lance Journalist
Ahmedabad

The sudden demise of Veteran actress Reema Lagoo is a great loss to the nation and to film industry. Reema became famous for portraying the 'middle-aged, modern and understanding mother' to some of the biggest stars in the industry on both big and small screens. Don't we think Reema's death is a reminder of the times when women actors had to hide their age and marital status or compromise on their career? She was regarded by film critics as the new-age mother of Hindi cinema. Known for playing mother's roles in blockbusters such as Maine Pyar Kiya, Aashiqui, Saajan, Hum Aapke Hain Koun, Vaastav, Kuch Kuch Hota Hai and Hum Saath Saath Hain, Reema Lagoo had also done extensive work on television including Shrimaan Shrimati and Tu Tu Main Main. She became synonymous as the affection-

ate and genial mother. She was one of the classic movie mother and one of the most endearing mothers to grace the big screen. Her roles in the films with Salman as mother recreated their camaraderie with varying degrees of success in a number of hits that followed. Through her different roles of Mother, she spread a message that Mothers are mothers whether they are ancient or modern, although their roles do diverge with the changing times. Her roles revealed that fact that mothers are like birds that keep their young under their wings, protecting and nurturing them always. Universally, the mother is the shock absorber of all conflicting emotions that arise among family members. The travails of a mother never end. She was an amazing actress with a beautiful smile. Her role in

Vaastav, where she played Shanta, mother of protagonist Raghu (Sanjay Dutt), will always be remembered for the strong portrayal of a mother to a wayward son. She had an incredible journey who consistently experimented with roles and yet managed to become one of Bollywood's most celebrated model - the ever-loving mother.

Her different roles of Mother gave a message to today's youth that Mothers are always taken for granted and we often fail to recognise their unconditional love and the sacrifices they make for the family. They are the ones who put our needs in front of theirs and are with us through thick and thin. We must ponder over about all the pains our mother took while we were sick, the hardships she went through in bringing us

up and all the sacrifices she made so that we can lead a better life.

What she did in each and every film and on TV was all from her heart. She had learnt never to take success or failure too seriously and lived her life happily. For her even failure of a film doesn't bother her too much as she was doing so one becomes immune to success and failure. She was a great actor and a greater human being. The motherly aura that she had about her was evident in the characters she lived on the silver screen. She has become a role model and an inspiring personality for every woman. Her quintessential doting and cool mother roles and her smiling face will never fade away from memory and she will be always remembered by her performance.

Chitale Committee recommends several measures for Desiltation of Ganga

Chitale committee on Desiltation of Ganga has recommended a slew of measures which include study of reach wise sediment transport processes along with establishing annual sediment budgets to guide de-silting activities, Preparation of annual reports (Sand registry) describing the previous desilting/dredging activity and a technical institute may be entrusted to conduct the

sediment budget, morphological and flood routing studies that would examine and confirm the necessity of the de-silting of the reach under consideration. The committee was constituted in July 2016 by the Ministry of Water Resources River Development and Ganga Rejuvenation and Ganga Rejuvenation to prepare guidelines for desiltation of river Ganga from Bhimgauda (Uttarakhand) to Farakka

(West Bengal). Shri Madhav Chitale (Expert Member, NGRBA) was appointed as Chairman of the committee. The other members of the committee were: Secretary, Ministry of Water Resources, River Development & Ganga Rejuvenation, Secretary, Ministry of Environment, Forests & Climate Change and Dr. Mukesh Sinha, Director, Central Water and Power Research Station, Pune. The committee was asked to establish difference between desilting and sand mining and also to establish need for desilting for ecology and e-flow of the river Ganga.

The committee in its report says erosion, sediment transport and siltation are very complex phenomena. It is impossible to apply a "one-

size-fits-all" approach to sediment management and control, because the issues involved are frequently very regionally-specific. Local factors such as topography, river control structures, soil and water conservation measures, tree cover, and riparian land-use or land disturbance (for example agriculture, mining, etc.) can have a large impact on sediment loads in rivers. River control structures (such as reservoirs), soil conservation measures and sediment control programmes can cause downstream sediment loads to decrease, while factors such as land disturbance (clearing of vegetation, for example) or agricultural practices can cause increased sediment loads.

AHMEDABAD STUDENT RANKED TENTH IN AIIMS PG Medical Entrance

Gujarat, Delhi Academy of Medical Sciences (DAMS) student, Dr Patel Kautilya made his parents and institute proud by achieving first Rank in AIIMS Medical entrance examination May 2017. Around fifty thousand doctors appeared for this nationwide exam and compete for various specialties. Dr. Patel Kautilya Rajendra Kumar attributes his success to his teachers in DAMS and his dedicated plans with lot of hard work and patience. Dr Patel Kautilya Rajendra Kumar is from Ahmedabad, Gujarat.

According to Dr. Patel Kautilya Rajendra Kumar DAMS played a vital role, as it is visual session and DVT (DAMS Visual Treat) was very helpful in his preparation. And with regular class, DAMS doubt solving mechanism was very excellent. The

online test series conducted by the DAMS was very helpful to crack the Grand Test Series. He was also grateful to his parents and mentor Dr Sumer Sethi for motivating him for the preparation of the exam, and he taught excellent radiology as well.

Dr. Sumer Sethi director, DAMS says that "At DAMS we provide education keeping in mind the current exam pattern and scenario, making students rank high in all post graduate medical entrance exams which definitely pave way to new comers to join our team to crack these examinations. He also added that cracking AIIMS medical entrance examinations is not easy as it depends on the preparation strategy that is followed very carefully and timely. He also congratulated all the students who cracked this examination. (18-7)

Vh1 to air the Billboard Music Awards

MUMBAI, xx:Vh1, India's only 24-hour International entertainment channel, is all set to bring all the razzle dazzle from the world of music right to your TV screens with the exclusive telecast of the much awaited 2017 Billboard Music Awards on May 22nd. As the biggest and the most popular names in music unite at the T-Mobile Arena in Las Vegas, Indian viewers will get to watch their favorite artists receive awards for the most popular songs of the year, exclusively on Vh1. The 2017 Billboard Music Awards are scheduled to telecast Monday, May 22, 6:30 AM with a prime time repeat at 9PM, only on Vh1.

The Billboard Music Award is an honor given by Billboard,

a publication and music popularity chart, covering the music business.

Thrilled about airing one of most sought-after award shows, Hashim D'souza, Programming Head - English Entertainment, Viacom18, shares, "As India's premier destination for international pop culture, we are committed to bring the best of international entertainment to our Indian audience. Esteemed award shows like the Billboard Awards, help generate awareness about international trends and bring our viewers closer to their favorite international artists. We are extremely elated to exclusively telecast the prestigious Billboard Awards yet again." (19-8)

Rank of India Improves in International Tourist Arrivals

As per the UNWTO definition, International Tourist Arrivals (ITAs) comprises two components namely Foreign Tourist Arrivals (FTAs) and Arrivals of Non-Resident Nationals. The UNWTO in its barometer ranks countries in terms of their ITAs. So far only the figures of FTAs were compiled in India. However, now India has started compiling the data arrivals of Non-Resident Indians (NRIs), also.

The number of NRI arrivals during 2014 and 2015 were 5.43 million and 5.26 million, respectively. Accordingly, the numbers of ITAs in India during 2014 and 2015 were 13.11 million and 13.28 million, respectively. The data of ITAs, containing both the arrivals of NRIs and FTAs, is now as per International recommendations.

Dr. Subhash Chandra (DSC) inspires students of Nirma University, Ahmedabad

Ahmedabad, Rajya Sabha Member of Parliament and Chairman Essel Group, Dr. Subhash Chandra (DSC) today addressed over 300 enthusiastic students of Nirma University, Ahmedabad for the next episodes of India's popular motivational youth show, the Dr. Subhash Chandra (DSC) Show. Dr.

Chandra drew from his own personal experiences to enlighten students on the 'The Magic of Belief' and 'Being Your Own Coach'. The inspirational guests for these episodes were Mr. Ashish Soparkar, MD of Meghmani Group of Companies, a 39-years-old reputed organisation and Mr. Vaibhav Puranik,

Assistant Manager, State Bank of Hyderabad, who despite being visually challenged, has beaten all odds to succeed. The change-makers for these episodes were Mr. Natubhai Patel, a 67-year-old who runs a unique marriage bureau called 'Vina Mulya Amulya Sewa' (VMAS) for senior citizens and Ms. Jigna Gajjar, an ex-cricketer who gives cricket coaching to children in the age group of 10-20 years professionally, but imparts her crickering skills to children from the economically weaker section of society free of cost. The DSC Show has recently returned to screens with a fresh look and format with an aim to showcase inspirational stories of people from different backgrounds. The episodes shot in Ahmedabad will be telecast on Zee Media's channels on June 24th and July 1st, 2017. (19-8)

Anant Geete Inaugurates The Test Track Facility for The Automotive-OEM for Automotive Manufacturers at Chennai

Union Heavy Industries & Public Enterprises Minister Shri Anant G. Geete today formally inaugurated the test track facility develop by Global Automotive Research centre (GARC) at Oragadam, Chennai. The same has been notified to issue certificates under CMVR 1989. The Global Automotive Research Centre (GARC) Chennai is a body working under the NATRIP

(National Automotive Testing & R&D Infra Project). On this occasion Shri Babul Supriyo, Union Minister of State HI&PE, Shri. M.C. Sampath Minister for Industries, Government of TN, Shri KN Ramchandran, Member of Parliament. Mr. K. Palani, MLA from Sriperumbudur constituency, officials from the Ministry of HI&PE and NATRIP and other dignitaries from industry, In-

stitution and academia were also present.

Speaking on this occasion Shri Geete said the Indian Automotive Sector plays a very important role in country's manufacturing sector and likely to contribute by 12 percent in the country's GDP over the next decade. Last year, the Government of India in collaboration with Indian Automotive Industry has raised the curtain from Automotive Mission Plan 2016-26. At present, the Indian auto industry is contributing by approximately 7.1 percent in the country's total GDP. Recently, the India's two wheeler industry has become the largest market in the world after replacing China. These days, the way technology is evolving, the Government of India is also looking forward to adopt new and different pathways to promote clean, safe, cheap and futuristic mobility services. This will help in creating new jobs both in research, development and manufacturing sector. As per the recent report of NITI Aayog on Transformative Mobility Solutions for All, India can reduce its energy demand by 64 percent and carbon emissions by 37 percent with the help of connected, shared and electric passenger mobility across the country.

The Minister said currently, the Government is also promoting the use of electric vehicles under FAME India Scheme, as it would help the Government to reduce the dependency on oil import. The National Automotive Testing and R&D Infrastructure Project (NATRIP) will play a crucial role to achieve the goals set by Government in the automotive sector under various

initiative like BNVSAP, upcoming BS VI Emission norms, Make in India initiative, Skill India, Minimum Government Maximum Governance etc. in coming years. He said NATRIP is the largest and one of the most significant initiative of the Government of India in the Automotive sector so far and represents a unique joining of hands between the Government of India, a number of State Governments and Indian Automotive Industry to create a state of the art Testing, Validation and R&D infrastructure in the country.

The Project aims at creating core global competencies in Automotive sector in India and facilitate seamless integration of Indian Automotive industry with the world as also to position the country prominently on the global automotive map. Shri Geete added. He said the Global Automotive Research Centre (GARC) is one of the biggest test centre established by Ministry of Heavy Industries and Public Enterprises under NATRIP which is spread over 304 acres of land having the research & development laboratories and test tracks at one location. The GARC has full-fledged homologation test facilities including the Test Tracks to certify all categories of vehicles, systems and components as per national and international standards. This centre is surrounded by major automobile manufacturers like Hyundai, Daimler, Renault, Nissan, Ford, BMW, Mitsubishi and many component manufacturers. Recently, Government of India has notified GARC as one of the authorized test agency for Type Approval and Homologation Testing under Rule No.126 of CMVR.

Tanishq launches 'Rivaah' a new wedding jewellery

Ahmedabad: Tanishq, India's largest and most-loved jewellery brand, announces the launch of its new sub-brand, Rivaah. With the launch of its second sub-brand, Tanishq makes available a wide range of stunning handcrafted wedding jewellery for brides from across India, designed and conceptualized by the Design Team in Bangalore. Tanishq believes that every bride deserves the best for her special day and has ventured into this category pre-summer wedding season. Rivaah will be available across the brand's large and expanding retail network, which is currently present across 205 stores. Jewellery from Rivaah begins at Rs. 1 lakh.

Rivaah is the union of Tanishq's tradition and craftsmanship - Rivaah and the sacred bond of marriage - Vivaah. Irrespective of which part of the country a bride hails from, jewellery is always an integral part of the wedding ceremonies. Rivaah comprises of ornate creations in gold, diamond, Kundan and polki, to cater to a bride hailing from any community across India.

Sharing his thoughts on the launch of the latest sub-brand from Tanishq, Sandeep Kulhali - Senior Vice President, Retail and marketing, Jewellery Division, Titan Company Limited says, "We are extremely proud to launch Rivaah, our latest sub-brand, dedicated to the Indian wedding category. Over the years, we have seen the potential for this category grow and we feel that now is the best time to carve our wedding jewellery offering into an identity of its own. With Rivaah, we will initially cater to 13 bridal communities across India and celebrate their culture. This new offering has the best-in-class design direction and marks the beginning of a new journey for not just the bride, but Tanishq too." (7-4)
